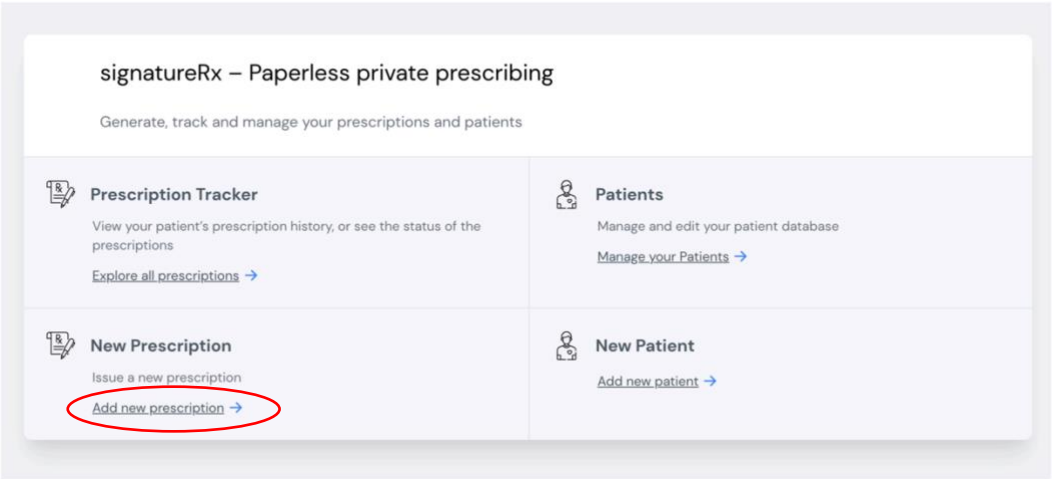
Issuing a prescription

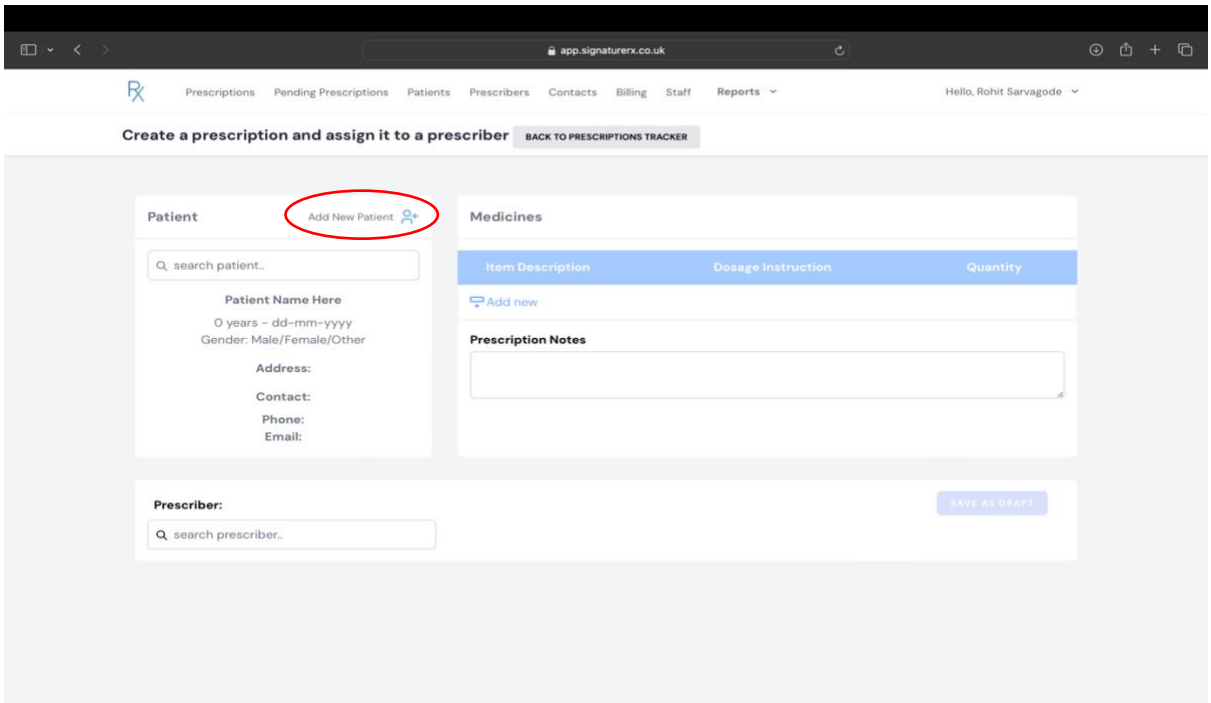
Note: We advice keeping your laptop open and being signed-in to your online prescription dashboard whilst on the consultation call as you would require information like email, date of birth and address from the patient to enter when prescribing the medication.

1- Sign in to Signaturex

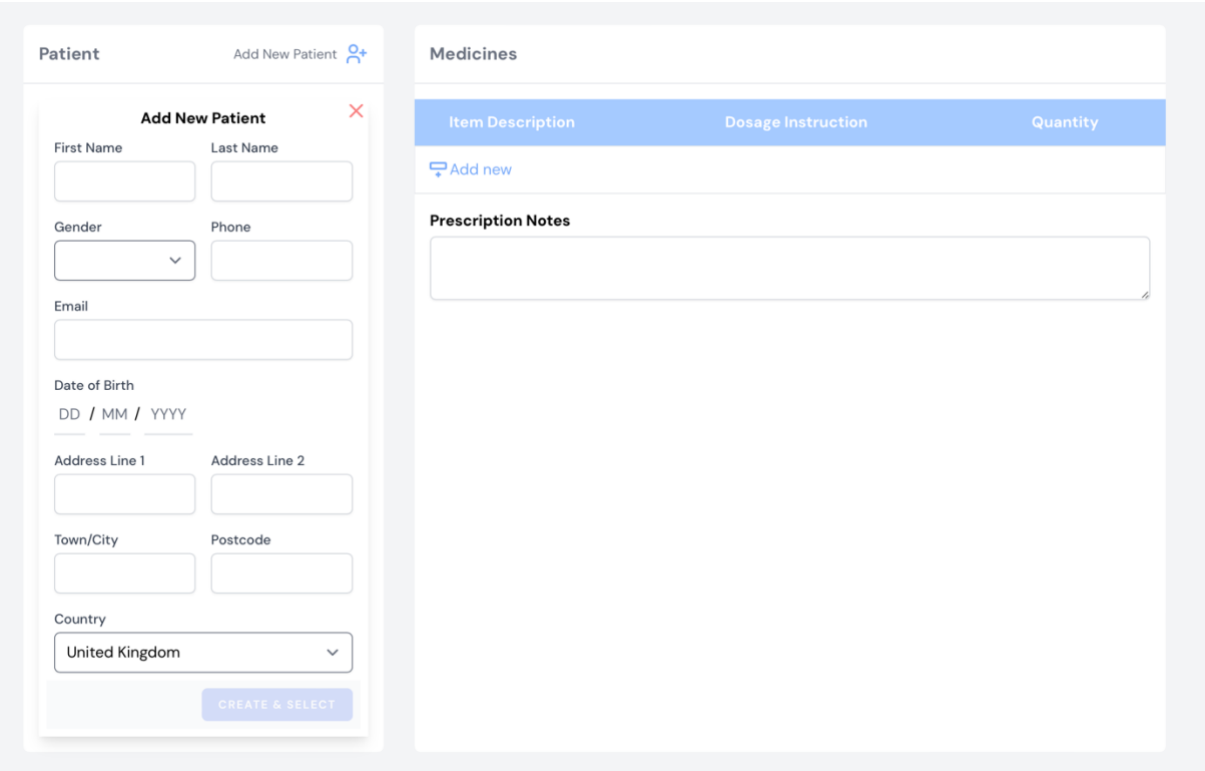
To issue a prescription, select 'Add new prescription' on the login dashboard



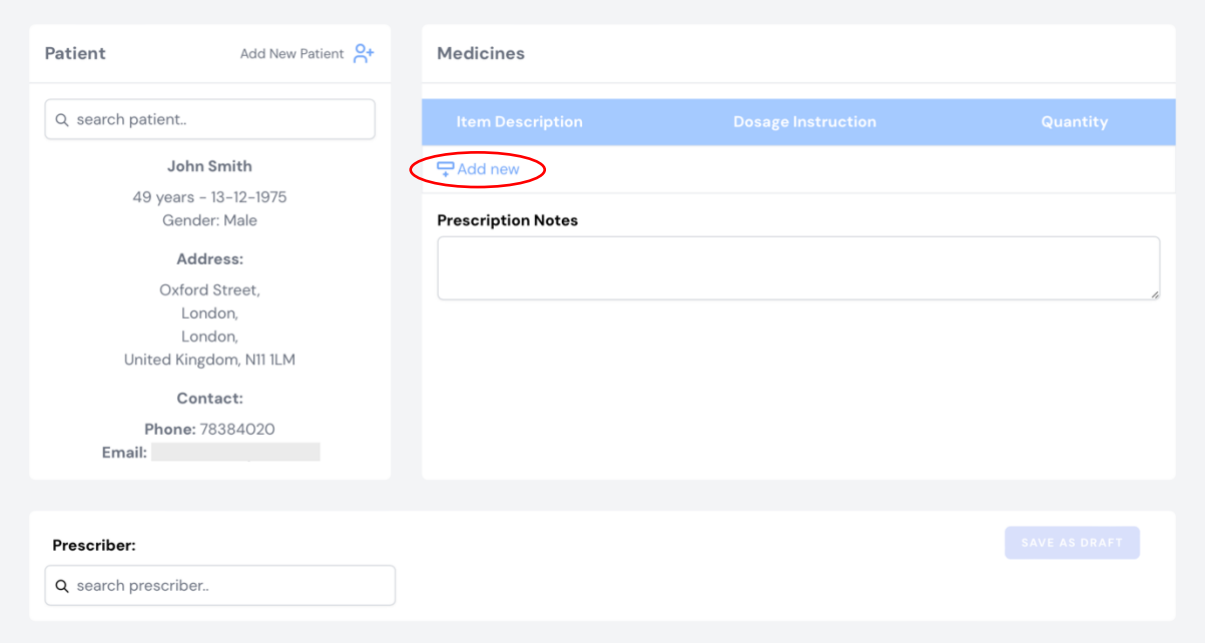
2 – Click "Add New Patient"



2- (Continued) Fill in the patient details whilst on the call & then click “Create & Select”

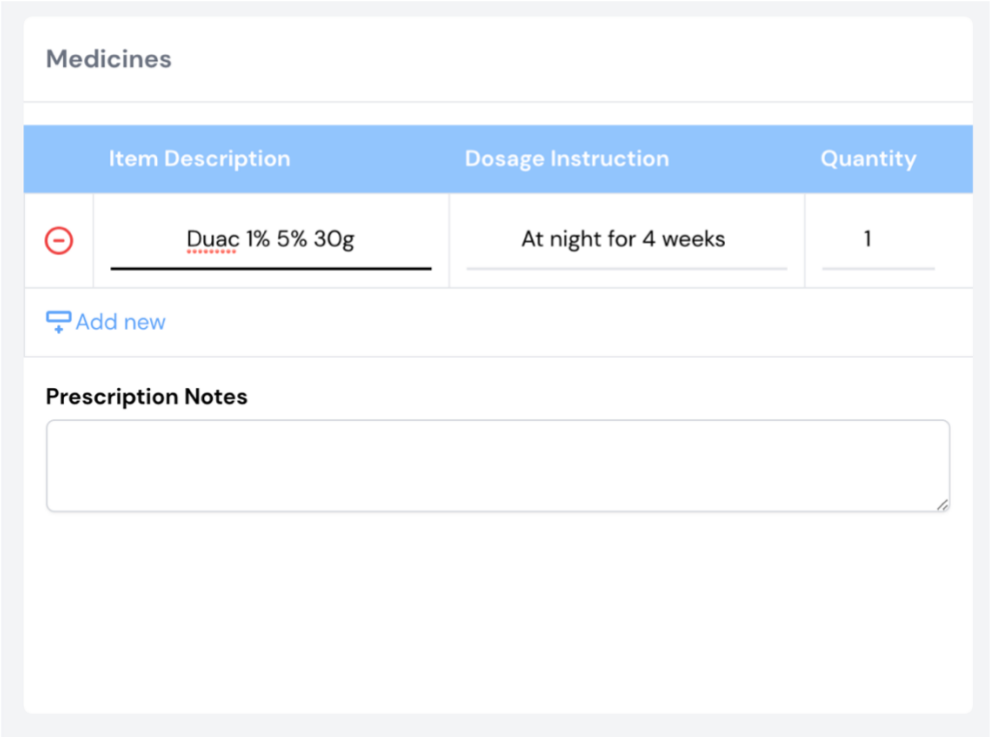


3 – You can now add the medication by clicking “Add New.



3 – (Continued) Enter medicine name in “Item name” and select medicines from the drop down menu . Enter dosage instruction and quantity for e.g. see below. Prescription notes are optional, The prescription notes field can be used if the patient has any brand requirements, requests or allergies.

When signing the prescription, select ‘issue for collection’.



4 – Once the above steps are completed, the patient receives an email (below) which they can take to a pharmacy and get their medication. The email will also include a list of pharmacies that they can choose to go to.

Issue for collection:
When selected, the patient will receive an email (and SMS if selected) with a Prescription ID, this prescription ID can be taken to a local pharmacy who will be able to access the prescription and dispense the medication.

The email will also provide the patient details on how to collect their prescription and it will have a button which will allow them to select delivery. Here is a sample of the email:

Here are your prescription details from sk:n clinic :

Prescription ID
SRX92BE308CA6C2

IMPORTANT

Please inform the pharmacy this is a prescription generated by **SignatureRx**

To dispense this prescription present at a pharmacy and ask them to visit **signaturerx.co.uk**

PRESCRIPTIONS SIGNED BY SignatureRx

Want your medication delivered?
